Outline			
<p>To achieve the educational goals set by the department, it is important, in addition to take courses, to interact with teachers, postdocs and other graduate students in the same field of research to understand what is going on in the field and how one's research is related to the rest of the research activities in the field. The students in the 3rd, 4th or the 5th grade, who have attended the weekly seminar in the field of solar and plasma astrophysics, will be given credits for their active participation in the seminar.</p>			
Goal			
<p>1)To be able to state clearly how one's own research is related to the rest of the research activities in the field of solar and plasma astrophysics, by grasping what is going on in the field, through participating in scientific discussions during the seminars given by researchers within and outside NAOJ. 2)To be able to explain one's own research to, and take part in scientific discussions with, researchers of different subfields.</p>			
Grading system
